

# ENVIRONMENTAL WEEDS

## SMALL "GARDEN" WEEDS

Many of these carpeting weeds crowd out Australian species along roadsides, beside paths, throughout flora reserves and National Parks. They can have a negative impact especially where small endangered Australian species grow, e.g. in heathland orchid habitat.

These weeds also seed prolifically thus enhancing their ability to spread. While not as invasive as some of the larger weed species it is worthwhile to restrict their growth within and beyond gardens.

For information on identification, control or removal, contact the Great Ocean Road Committee on 5261 2496, ANGAIR on 5263 1085 or Anglesea Coast Action on 5263 3327.
